GET UP TO

£14k in government grants

Position yourself as a leader in sustainability and the electric vehicle revolution, whilst supporting the growing demand for charging infrastructure.

Installing EV charging points is a quick and easy way to support employees with the adoption of electric vehicle options as well as stand out against your competitors. There is also a range of grants available alongside finance options, so installing EV chargers can be more obtainable than you might think!

Attract customers

Offset Carbon emissions

Boost employee satisfaction

Enhanced Reputation

Charging for employees:

Increase employee satisfaction by offering charging options for their EV vehicles. Support any new and existing staff to join the EV revolution and upgrade their vehicle to an electric, more sustainable option.

Destination Charging

Any business can attract EV owners. Whether they choose you over another business or you generate money through offering charging to the public, you could increase your revenue and reputation.

Let us help your business support the adoption of EV charging, from start to finish we can help you throughout the whole process!

The Process:

We are here to support your EV journey from start to finish. We will be on hand to support you through every step and offer expert advice:

Consultation > Site Survey > System Design > Quotation > Installation > Maintenance

EV Grants and Incentives:

Cut upfront EV infrastructure costs with grants and workplace charging schemes. We can support you on the eligibility of different grants as well as choosing the correct one for your business and EV charging goals.

Workplace Charging Scheme grant: covers up to 75% of the total costs of the purchase and installation, capped at a maximum of £350 per socket and up to 40 sockets across all sites.

Electric Vehicle Infrastructure grant: for sockets you wish to install now or any in the future. £850 per charge point across a minimum of 5 parking spaces and must be for staff or fleet vehicles only.

CAPEX Option:

Outright purchase for immediate ownership. Monetise your chargers with the option to take 100% of the revenue generated from public activity. Further upfront investment costs can be reduced by utilising the OZEV Workplace Charging Scheme grant.

Finance Option:

Minimal upfront costs to make EV's accessible for all businesses, allowing everyone to enjoy the benefits of EV charging even with any budget constraints. Terms can also be flexible, with an option of ownership at the end.

We provide a complete range of commercial EV charging solutions, from fast to ultra-rapid charging infrastructure, along with smart management systems.
